Free AI workshop · Classes 6–8

What your child did in today's AI workshop

Two hours of guessing, drawing, training and asking good questions. No child logged in to any chatbot: only the teacher typed, on the projector.

1 Guessed
Played “AI or not AI?” and found the AI hidden in YouTube, Maps and face unlock.

2 Drew
Drew pictures in 20 seconds and watched an AI try to guess them live.

3 Trained
Taught a computer to recognise rock, paper and scissors hand signs, in a team.

4 Asked
Learned to write clear questions for AI, and saw that AI can be confidently wrong.

5 Spotted
Looked for clues that a picture is made by AI: fingers, text, shadows.

6 Promised
Took the AI pledge: use AI to learn, create and help, and stay safe, honest and kind.

Try at home together (10 minutes)

1. Ask your child: “What is AI?” and “How did you make the computer learn rock, paper, scissors?”
2. Play Quick Draw together at quickdraw.withgoogle.com. No sign-up is needed.
3. Ask them to tell you the 5 golden rules on the right.

5 golden rules of AI

1. Never share your name, address, phone or photos with AI
2. Check important facts before you believe them
3. Use AI to learn and practise, not to copy homework
4. Ask a parent or teacher before using a new AI app
5. Be kind: no fake pictures or mean content about anyone

Want your child to keep learning?

Live online classes on Google Meet, batches of 10–15. Three levels of 8 weeks each (1-hour classes every Saturday and Sunday), each ending with a project showcase.

Classes 6–8: Make with AI · Classes 9–12: Build and Study with AI

Level	What students do	Classes 6–8	Classes 9–12
Level 1 · Basics	Understand AI, use it safely, first game	**₹2,000**	**₹4,000**
Level 2 · Builder	Games, chatbots, websites and apps	**₹2,500**	**₹4,500**
Level 3 · Advanced	Real coding with Python and AI projects	**₹3,000**	**₹5,000**

Fees are per student for the full 8-week level.

Launch offer: no admission fee for the first 51 students, plus a free demo class.
