AI classes for school students · Classes 6–12

Learn AI by building real things.

Weekend classes where students make games, apps, websites and chatbots with AI, understand how AI really works, and learn to use it the right way for studies. From basics to advanced, in three levels.

First batch: free admission and a free demo class for the first 20 students.

CLASSES 6–8

Make with AI

Games, chatbots and first steps in coding

CLASSES 9–12

Build and Study with AI

Smarter studying, websites, Python and AI projects

Level 1 · Basics
Understand AI, use it safely, first projects

Level 2 · Builder
Build games, chatbots, websites and apps

Level 3 · Advanced
Real coding with Python and AI projects

Offline in Rewari · Live online · Small batches of 10–15

How the program works

3 levels, step by step
Every student starts at Level 1 (Basics) and moves to Level 2 (Builder) and Level 3 (Advanced). Students with prior experience can start higher after the demo.

8 weeks per level
One 2-hour class every weekend (16 hours per level), with a short fun task between classes.

A project every level
Each level ends with a showcase where students present what they built to parents.

Certificate
Students receive a certificate of completion for every level they finish.

Levels and fees

Level	What students do	Duration	Classes 6–8	Classes 9–12
Level 1 · Basics	Understand AI, use it safely, first projects	8 weeks · 16 hours	**₹2,000**	**₹4,000**
Level 2 · Builder	Build games, chatbots, websites and apps	8 weeks · 16 hours	**₹2,500**	**₹4,500**
Level 3 · Advanced	Real coding with Python and AI projects	8 weeks · 16 hours	**₹3,000**	**₹5,000**

Fees are per student for the full 8-week level. Free demo class before joining. Free admission for the first 20 students.

Who teaches
Manish Chauhan is a full stack software developer with 8+ years of experience building websites and apps, including for large US technology companies. He builds with AI every day and runs his own software products. Students learn from someone who does this work for real.

What students need
Level 1 works with a phone or computer. A laptop or computer is needed for Levels 2 and 3 and for online classes. No coding knowledge is needed to start.

Classes 6–8

Make with AI

Level 1 · Basics Discover AI

₹2,000 / 8 weeks

Week 1	What is AI? Spotting AI around us: maps, YouTube, voice assistants	Week 2	How computers learn from examples: train a model to recognise pictures
Week 3	Talking to AI: asking clear questions and checking the answers	Week 4	Scratch basics: characters, movement and loops
Week 5	Make your first game in Scratch	Week 6	AI for studies: flashcards and quizzes the right way
Week 7	Online safety: privacy, deepfakes and fake news	Week 8	Mini project and showcase for parents

Level 2 · Builder Make with AI

₹2,500 / 8 weeks

Week 1	Game design: plan a game with goals, scores and levels	Week 2	Build a bigger Scratch game with levels and a score
Week 3	Train an AI model to recognise drawings or hand gestures	Week 4	Use your AI model inside your Scratch game
Week 5	Build a chatbot about a favourite school subject	Week 6	AI images and stories: creativity, honesty and copyright
Week 7	Make a personal study planner with AI	Week 8	Project week and showcase

Level 3 · Advanced Code with AI

₹3,000 / 8 weeks

Week 1	Start Python: drawing shapes and patterns with code	Week 2	Variables, loops and conditions through mini games
Week 3	Build a quiz game in Python	Week 4	How chatbots work: build a simple chatbot in Python
Week 5	Data and charts: run a class survey and chart the results	Week 6	Build a web page about yourself with HTML
Week 7	Final project build with teacher support	Week 8	Showcase and certificate

Classes 9–12

Build and Study with AI

Level 1 · Basics AI for Study and Life

₹4,000 / 8 weeks

Week 1	How AI and chatbots really work, and why they make mistakes	Week 2	Asking AI good questions: clear prompts that get useful answers
Week 3	AI for board exams: revision plans and practice questions	Week 4	AI for JEE and NEET concepts: explain, then verify with NCERT
Week 5	Research and fact-checking: sources and academic honesty	Week 6	Notes, summaries and flashcards that help you remember
Week 7	Safety: privacy, deepfakes and scams	Week 8	Project: your personal AI study system, plus showcase

Level 2 · Builder Build with AI

₹4,500 / 8 weeks

Week 1	How websites work: HTML and CSS basics	Week 2	Build your personal portfolio website
Week 3	Using AI as a coding assistant, and checking its code	Week 4	JavaScript basics: make pages interactive
Week 5	Build a web app: a quiz, planner or to-do app	Week 6	Publish your website online for free
Week 7	Project week with teacher reviews	Week 8	Showcase: a live website you can share

Level 3 · Advanced Python and AI Projects

₹5,000 / 8 weeks

Week 1	Python basics for real projects	Week 2	Working with data: lists, files and spreadsheets
Week 3	Charts and analysis with Python	Week 4	How machine learning works: train your first model
Week 5	Connect a Python app to an AI model	Week 6	Build a project: a study helper or an image recogniser
Week 7	Portfolio and GitHub for college applications	Week 8	Showcase, certificate and careers in AI

For schools and institutes

Bring practical AI learning to your students without extra load on your teachers.

Free AI workshop

A 2-hour hands-on session for one class group. Students build something small and learn to use AI safely. Free of cost.

AI club in school

The same 3-level program run weekly at your school, in your computer lab or classroom, for interested students.

Session for teachers

A practical session on using AI for lesson planning, question papers and saving time, with clear rules on responsible use.

School programs are planned with you; pricing on request.

Our approach to safe and honest use

- ✓ Students learn to use AI for practice and understanding, never for copying homework or exams.
- ✓ Every level teaches privacy, deepfakes and checking facts.
- ✓ Students use AI tools with the teacher's guidance during class.
- ✓ Parents see what their child built at every showcase.
