Let's Learn AI!

Free AI Workshop · Classes 6–8 · 2 hours of making, guessing and playing

with Manish Chauhan, software developer

Today's mission

1. Guess

Is it AI or not?

2. Draw

Can AI guess your drawing?

3. Train

Teach a computer yourself

4. Talk

Ask AI good questions

5. Stay safe

Golden rules of AI

Game: AI or not AI?

YouTube suggesting your next video

A calculator doing 25 × 4

Google Maps finding a faster road

A light switch

Phone unlocking with your face

An alarm clock ringing at 6 am

So what is AI?

AI is a computer program that **learns from examples** and then **makes a smart guess.**

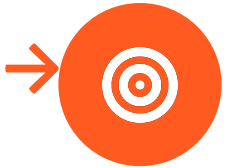

Sees lots of examples

1,000s of cat photos

Finds the pattern

ears, whiskers, tail

Makes a guess

"This looks like a cat!"

Activity 1: Can AI guess your drawing?

15 minutes · pairs

1. Open quickdraw.withgoogle.com
2. Click "Let's Draw!"
3. Draw the word you see in 20 seconds
4. Watch the AI try to guess it live
5. Swap turns with your partner

Challenge

Which pair gets the most drawings guessed out of 6?

Don't write your name on the screen

Why did the AI guess right… or wrong?

Guessed right

It has seen millions of drawings like yours.

Guessed wrong

Your drawing looked like something else, or it had too few examples.

Big lesson

AI is only as good as the examples it learns from.

Activity 2: Teach a computer yourself

20 minutes · groups of 3–4

1. Open teachablemachine.withgoogle.com
2. Get Started → Image Project → Standard
3. Rename classes: Rock, Paper, Scissors
4. Hold to record ~50 pictures for each hand sign
5. Click Train Model, then test it live!

Your pictures stay on your computer. Nothing is uploaded.

Make your AI smarter

More pictures

Record more examples for each sign

Different angles

Move your hand near, far, left and right

Add "Nothing"

A class with just the background

Different hands

Let every group member record

Break time!

10 minutes · water, snacks, stretch

Talking to AI: ask good questions

Unclear

"Tell me about plants"

Too big. AI doesn't know what you need, so you get a long, boring answer.

Clear

"Explain how plants make food, for a Class 7 student, in 5 short points with a cricket example"

Who it's for + what you want + how long

Prompt challenge: you write, I type

10 minutes · whole class

Study helper

"Make 5 quiz questions on fractions for Class 7, with answers at the end"

Creative

"Write a 4-line poem about our school's sports day"

Curious

"Explain why the sky is blue, like I am 11 years old"

AI can be confidently wrong

AI sometimes makes up facts and sounds very sure about them.

Always check with:

- Your textbook (NCERT)
- Your teacher or parents
- A trusted website

Real or fake? Spot the AI picture

Hands and fingers

Extra, missing or bent fingers

Text in the picture

Jumbled or nonsense letters

Light and shadows

Shadows going the wrong way

Too perfect

Skin and hair look plastic

Never make fake pictures or videos of real people. It can hurt them.

5 golden rules of AI

Never share your name, address, phone or photos with AI

Check important facts before you believe them

Use AI to learn and practise, not to copy homework

Ask a parent or teacher before using a new AI app

Be kind: no fake pictures or mean content about anyone

My AI pledge

"I will use AI to learn, to create and to help, and I will always be safe, honest and kind."

Show and tell

1

Show your Rock-Paper-Scissors AI working

2

Tell us one thing that made it smarter

3

Share one rule you will follow

1 minute per group · everyone claps for everyone

Want to build more?

AI classes for Classes 6–12, from basics to advanced

Level 1 · Basics	Discover AI, safe use, first game
Level 2 · Builder	Bigger games, your own AI model, chatbot
Level 3 · Advanced	Real coding with Python and HTML

Weekend batches in Rewari + online · first 20 students: free admission

Ask your parents to scan
